(54) Titre : SOUTIEN-GORGE AMELIORE SANS BRETelles ET PARTIE DORSALE
(54) Title: AN IMPROVED BACKLESS, STRAPLESS BRA

(57) Abrégé/Abstract:
A backless, strapless bra (10) comprising a pair of bra cups (12) having an interior surface facing towards a user's skin that comprises a pressure sensitive adhesive layer (33) disposed thereon for adjoining the bra cups to the user's skin. The bra cups are permanently or removably adjoining by a connector (14) that is positioned between inner side portions of the bra cups. The connector can have a variety of configurations that enable the user to attach the bra cups. The connector allows the user to create a desired amount of breast cleavage and breast push-up enhancement. The bra cup also includes a pull-up device (68) that attaches to the top portion of the bra cups and allows the user to lift the bra cups and the user's breasts to provide additional breast push-up enhancement.
